3 Update to GC about proposed Sewage Treatment Plant (STP) at KLS GIT campus

Preamble: As per KLS BOM Res. 32 dated 06.04.2024, KLS BOM has accorded approval in principle for construction of 350 KLD Sewage Treatment Plant at KLS GIT. The excerpts of BOM Res. 32 dated 06.04.2024 are as under:

RESOLUTION NO.32

Considered Governing Council Resolution No.3 dated 02.04.2024 of KLS GIT, Belagavi regarding consultancy services for STP. During discussion, it is brought out that the existing STP in KLS GIT campus is insufficient as per KSPCB norms. As per the existing constructed area and habitation, the STP of 350 KLD is necessary. This is hindering the Corporation permission for new constructions. Also as per the discussion, the new STP cannot be installed on the newly acquired land. The approximate cost of 350 KLD is ₹2 Crores to 2.5 Crores.

The matter was discussed in detail. The proposal along with STP of 350 KLD in GIT is approved in principle at the budgeted cost not exceeding Rs.2.5 crore4s. Governing Council, GIT is authorized to call for tenders and place the same before Tender Scrutiny cum Monitoring Committee. The Tender Scrutiny cum Monitoring Committee is requested to negotiate with the Agencies and submit an Evaluation Report to BOM for further consideration.

A. Comparison of Technology:

Sl. No.	Parameter	Sequential Batch Reactor (SBR)	Membrane Bio-Reactor (MBR)
1	Treatment	Suspended growth	Suspended growth with filtration
2	Effluent quality	Good	Excellent
3	Efficiency	Good	Very High
4	Specific problem	- Accumulation of sludge. - High energy consumption.	- Membrane fouling. - High energy consumption.
5	Land Area required (m ²)		
	350 KLD	450	300
	400 KLD	500	350
6	Capital Cost (₹ Crores)		
	350 KLD	2.5 - 2.8	2.3 - 3.0
	400 KLD	2.8 - 3.1	2.5 - 3.2
7	Operating cost (₹ Lakhs/ Year)	35 - 40	40 - 45
8	Tertiary treatment (Filtration and disinfection)	Required	Not Required

B. Case study:

➤ **AEQUS**

- 50 KLD plant working on MBBR was installed in AEQUS. Since, its performance was not satisfactory and didn't meet KSPCB standards of treated effluent, the technology was discarded.
- 300 KLD plant working on SBR was installed in 2019.
- However, tertiary treatment is must for MBBR and SBR.

➤ **Belagavi City STP - SBR Based (under construction).**

C. Recommendation:

- Existing STP has to be retained while new one is built.
- Land Area available after retaining existing STP at KLS GIT will be 400 m².
- Therefore, it is advisable to go for MBR Technology with 400 KLD.

Following information and updates related to the proposed Sewage Treatment Plant (STP) at KLS GIT was submitted by HOD-Civil Engg. Dept.:

- I. **Augmentation of STP:** Letter was submitted for augmentation of existing STP at our campus (dated 09th March 2024).
- II. **Site Visit:** Visited STP in AEQUS on 19th March 2024. Following information was gathered during the visit:
 - a) The earlier STP at AEQUS was working on MBBR Technology of 50 KLD capacity. Since, its performance was not satisfactory and didn't meet KSPCB standards of treated effluent, the technology was discarded.
 - b) Further, STP working on SBR of 300 KLD capacity was proposed and installed in 2019. Since then, the effluent quality is good enough to meet the EC norms and also treated effluent is reused for gardening and flushing.
- III. **Capacity related to STP:** Based on the existing faculty (teaching and non-teaching), students and maintenance staff considering increase in intake and hostel capacity, the estimated sewage generation is 350 KLD. However, considering future expansion of infra-related projects, comparison of 350 KLD and 400 KLD was considered.
- IV. **Technology:** Most of the Institutes have adopted SBR technology. However, it was opined to have MBR technology to compare the capital and running maintenance cost with SBR technology. MBR mainly uses

membrane and average life of the membrane varies from 3 years to 6 years. List of the institutes having SBR technology is attached with this document for your kind perusal.

- V. **Freezing of Specifications:** For SBR and MBR the details of electromechanical units (pumps, screens, air blowers, diffusers, filters, LT panel, sludge dewatering system) and Civil units have been incorporated while calling for quotations. Also, it was opined that freezing of all the technical specifications will not give the vendor any flexibility based on their own design, this will make them quote only as per the specifications given. **They may absolve from giving any performance guarantee and may say that they have supplied/ constructed the plant as per our specifications.** In future chlorination post treatment will be banned therefore we may have to include Ozonation/ UV treatment as the finishing stage. Hence, the vendor can quote for ozonation/ UV treatment instead of chlorination. Therefore, it was opined to give flexibility for vendor to design (both hydraulic and structural design including grade of concrete) and quote for 350 KLD and 400 KLD.

- VI. **Scope of the Work:** Scope of the work covers the following and have been stated during call for quotations (350 KLD and 400 KLD).

- a. The construction of proposed STP should be without disturbing the present STP operations otherwise we will have a problem of discharging untreated sewage. Therefore, the new installation will be executed without disturbing the present installation. However, following units/ civil works are existing and have to be utilized for the proposed STP:
 - i. Wet well: 4.45 m Dia and 4.2 m depth
 - ii. Sludge drying bed: 3.2 X 3.2 X 0.5 m depth
 - iii. Effluent storage tanks: 4.95 m dia and 2.80 m depth.
- b. The work includes submission of hydraulic as well as structural design with Detailed Project report (Process Design, detailed engineering, prepare & submit civil requirement drawings).
- c. Execution of civil works, Manufacture / Procure, Supply at site, Install and Commissioning of all the electromechanical works for the plant.
- d. Operate and maintain the plant for a minimum period of One year from the date of commissioning.
- e. Filters also to be in auto for SBR option.
- f. It is mandatory to use the existing tanks. Accordingly, the quotations have to be submitted.
- g. The proposal for additional units if any can be quoted (Optional).
- h. The said project should be quoted for turnkey basis.
- i. Participate in technical discussions with KSPCB officials.
- j. The treated water should be fit for re-use for gardening as well as for flushing toilets and should satisfy pollution control board norms.
- k. The treated water should be fit not only from the view point of re-use for the purposes mentioned above, but also should be hygienically safe, so that people's health is least affected due to contact with treated water or by its spray and consequent biological aerosol.

Minutes of the meeting of the Governing Council of KLS GIT (Engg. Section)
Held on Tuesday, May 14, 2024, at 04.00 P.M. in Governing Council Room of KLS GIT

- l. The treated water should be such that its continuous use even for very long periods do not make the soil "SEWAGE SICK", nor will it affect the other processes.
- m. The treated garden water, with a BOD5 of less than 5 mg/l, and TSS of less than 10 mg/l., should be sparklingly clear, free from any odour and its re-use should not create fly nuisance.
- n. The proposed STP should be economical in terms of initial capital cost and operating cost and at the same time, versatile enough to deliver the desired output in terms of quality parameters on continuous basis. Further the plant should be easily operatable by semi-skilled personnel.
- o. Replacements, if any, at a later date, should be easily available locally and at short notice period.
- p. The technology proposed should be time tested and must be under use already elsewhere for similar applications, particularly in tropical environments such as Belagavi.
- q. The structures for STP should be compact in size / layout and be impervious and water tight to avoid drifting of odour and ground water pollution.
- r. The Plant should meet KSPCB norms in all respects.
- s. The STP should have built-in flexibility to handle variations in flows / characteristics, with or without simple modifications in process and without incurring major additional expenses.
- t. **AUTOMATION TYPE:** Based on PLC including for UF and other filters.
- u. **PROJECT COMPLETION TIME:** 06 Months (after placing the Work order).
- v. **EXCLUSIONS and WARRANTY:** Should be clearly mentioned by the vendor.

VII. Conclusions: To adopt SBR technology with 350/400 KLD capacity considering future expansion and capital investment. Accordingly, quotations have been called for. However, to compare the cost with high end technology, MBR has been considered.

Discussion & Decision:

GC noted the details placed in the meeting.

GC informed HOD-Civil Engg. Dept. to get sealed quotations.

GC requests KLS BOM to grant permission to open the quotations and make a pre bid study.

4 Updated GC about deployment of ERP "MasterSoft"

Discussion & Decision:

During the meeting, Controller of Examination briefed GC about the satisfactory progress being made for installation of ERP Software.

GC noted the details placed in the meeting.

Matter is referred to KLS BOM for its information.

8 Considered the proposal regarding additional approval for External Painting work of IIPC Building submitted by Dean Infra. & Planning (Amount involved: ₹81,000/-)

Preamble: As per GCR No. 08 dated 30.04.2024, GC resolved to place order with M/s. S. B. Krishnoji, Belagavi at the negotiated amount of ₹1,90,000/- including GST towards painting work of external walls of IIPC building.

Accordingly, the work order was given to M/s. Krishnoji and he has started the painting work of IIPC building. During pressure washing, it was observed that, there are many hairline cracks and minor cracks on the surface. These cracks cannot be filled with regular primer and paint coat, hence it is proposed to apply a damp proof coat instead of primer. The estimated additional amount is ₹81,000/-.

GC is requested to consider the proposal and sanction ₹81,000/- towards the same.

9 Considered the proposal regarding purchase of pens submitted by Dean Administration (Amount involved: ₹75,000/-)

Preamble: Dean Administration submitted proposal regarding purchase of pens. It is stated that, during previous academic years, we have presented the pens to all the fresh students of UG and PG. This academic year 2024-25, we are planning to present the pens to all the fresh students of UG and PG and to eminent dignitaries visiting the college.

In this regard, we are planning to procure:

- a. 2000 No's of pens to the 1st year students of UG as well as PG program
- b. 300 No's of pens to eminent persons visiting our college

Hence, it is requested to consider the proposal and sanction ₹75,000/- towards the same.

Last year, we had purchased the Pens from Mr. Manohar Omprakash, Mumbai as per the following details:

- a. 1500 pens X 22 per pen = ₹33,000/-
- b. 300 pens X 69 per pen = ₹20,700/-
- c. **Total** = **₹53,700/-**

Minutes of the meeting of the Governing Council of KLS GIT (Engg. Section)
Held on Tuesday, May 14, 2024, at 04.00 P.M. in Governing Council Room of KLS GIT

11 Discussed about BOM Resolution No. 34 dated 06.04.2024 regarding resignation of Dr. Nitendra Palankar, Professor, Civil Engg. Dept.

Preamble: The excerpts of BOM Res. No. 34 dated 06.04.2024 are as under:

RESOLUTION NO.34 | 06.04.2024

Considered Governing Council Resolution No.10 dated 02.04.2024 of KLS GIT, Belagavi regarding the resignation letter dated 26.03.2024 submitted by Dr. Nitendra Palankar, Professor, Civil Engg. Dept. During discussion, it is brought out that Dr NitendraPalankar is a confirmed employee and has tendered resignation w.e.f 26.03.2024 by giving 3 months' notice period from 26.03.2024.

The matter regarding tender of resignation by Dr. Nitendra Palankar was discussed in detail. Primarily, it appears as though the execution of a bond to serve for a minimum period of two years is the immediate cause. The resolution passed by BOM regarding execution of bond was examined and it is seen therefrom that in deserving cases, discretion has been given to the Board to waive this condition. The academic achievement and performance of Dr. Palankar is exemplary and hence the Board thought it fit to meet and discuss the issue in detail with him. Accordingly, Dr. Nitendra Palankar, who was present was called into the meeting. After detailed discussion, he was agreeable to reconsider his decision and continue with the Institution. He was accordingly advised to meet the Members of the Governing Council and take a final decision in the matter. Until then, it was resolved to defer the matter awaiting a further resolution of the Governing Council of GIT, in this regard.

Discussion & Decision:

GC noted the details placed in the meeting.

In view of BOM Res. 34 dated 06.04.2024, the matter regarding resignation of Dr. Nitendra Palankar was discussed during the meeting.

Principal – KLS GIT appraised the GC. GC recommends KLS BOM to process the resignation of Dr. Nitendra Palankar. He may be relieved from his services w.e.f. 24.06.2024 after office hours.

Matter is referred to KLS BOM for its consideration.

12 Interviewed candidates for the post of Graphic Designer

Preamble: As per BOM Res. 30 dated 06.04.2024, BOM has accorded approval for the appointment of Graphic Designer at KLS GIT.

Further, as per GCR No. 03 dated 30.04.2024, since neither of the two candidates who were present were found suitable, GC advised Publicity Coordinator to issue fresh advertisement on social media inviting applications for the post of Graphic Designer, and also call the one candidate who was not present.

Accordingly, a fresh advertisement was published on the social media inviting applications for the post of Graphic Designer. In response to our advertisement, we have received 4 applications for the post of Graphic Designer. The evaluation report of the candidates would be placed in the meeting.

Discussion & Decision:

GC noted the details placed in the meeting. Four candidates were interviewed.

Since, no suitable candidates were found for the appointment as Graphic Designer at KLS GIT, GC opined to continue with the existing arrangement of hiring the services of professional agencies for flyer designing work on assignment basis.

Publicity Coordinator is to take necessary action in the matter.
