Karnatak Law Society's Gogte Institute of Technology, Belagavi
Minutes of the meeting of the Governing Council of KLS GIT (Engg. Section)
Held on Tuesday, July 23, 2024, at 04.00 P.M. in Governing Council Room of KLS GIT

1. There is water leakage through the roof as there are holes in roofing sheets in few locations in the dining and kitchen area.
2. The walls are getting wet in rainy season (north of the dining room).
3. The rainwater gets percolated in the extended dining area of the mess which has a low plinth level.
4. The roofing sheets get unbearably heated up during summer season.
5. There is no proper ventilation in the dining and kitchen area.
6. The windows on the south side do not have grills.

(Above points are received from girls hostel rector)

Scope of work for reconstruction and repairs of KLS GIT Girls Hostel Mess:

Following modifications are to be done to resolve the said issues:

- a. Plinth height can be raised of the extended mess area of size 19.15M X 4.00M and kitchen/store area of size 6.23M X 9.14M up-to the existing dining plinth level to avoid the percolation of water in the extended dining area. Entrance steps and roof projection to be planned as per new plinth level.
- b. Tiling of the raised plinth portion to be done (approx. area 152.30 sq.m.).
- c. Hand wash area need to be redone as per the new plinth level.
- d. After raising the existing plinth area, the overall height of the structure can be raised by approximately 1.00M. This will help to accommodate ventilators at top level which will benefit reduction of heat issue during summers.
- e. Uniform roof (approx. area 334.09 sq.m.) can be constructed for overall structure, so that the leakage due to the RCC gutter in the existing roof can be resolved. (this will eliminate different levels and slopes in the roof).
- f. Turbo air ventilator on the roof can be provided in dining, and kitchen area to resolve the ventilation issue.
- g. Window grills, and other maintenance can be provided on the south side dining area wall, and provision of new openings in storeroom, and kitchen can be done.
- h. Wall dado can be provided in kitchen, and wet as well as dry stores to avoid the wall dampness.
- i. Overall painting of the structure for all internal areas to be done.
- j. External painting after removal of leakage points and water proofing.
- k. General electrification enhancement in service areas to be done (especially exhaust fans).

Income (net of expense) amounting to Rs.5,13,38,729.95/- is accounted in various ledgers in the group 'VTU Accounts' under 'Current Liabilities' in GIT books. This amount pertains to the amount collected by GIT post attaining Autonomous status. The breakup is attached for your reference. It is in the nature of income and not payable to VTU. Hence must be treated as a revenue item.

We suggest that this amount be written back to income in FY 2023-24 to ensure appropriate accounting methodology.

Further, going forward, all such income & expense needs to be appropriately accounted for after appropriate identification. Kindly advise on the said matter to effect the changes in Tally before 31/03/2024.

Please reach out for any clarifications in this regard.'

Further, since 01.04.2024 any such revenues are already treated as income.
