- **Addressing non-eligibility issue(Batch-2027):**

- Collecting eligibility data for current 3rd Semester.
- We will share info with all HODs.
- Request help to initiate action by the departments.

Discussion & Decision:

GC noted the details placed in the meeting. GC directed the placement team to accomplish the following and present in the next GC meeting:

- i. Talk to 10 PWD Engineers and find out information regarding coaching institutes they attended and preparation methods for the PWD exam.
- ii. Talk to IIT Kanpur for Aeronautical certification courses and also check with HAL regarding their additional certification courses
- iii. Provide eligibility data along with placement statistics presented.
- iv. Principal and HODs along with placement team to design plan for making non eligible students placeable.

Matter is referred to KLS BOM for its information.

5 Discussed about obtaining NOC from Pollution Control Board submitted by Dean Infra. & Planning

Preamble: The proposal discussed during the KLS BOM Meeting dated 17.08.2024 does not contain the item liasoning for KSPCB certificate. The same has to be arranged by KLS GIT.

Discussion & Decision: Dean (I&P) presented the background.

Mr. Siddhu Hosamani, Consultant, attended the meeting and explained the matter.

GC noted the details placed in the meeting.

GC requested Mr. Siddhu Hosamani to submit an estimate of expenses as soon as possible.

Matter is referred to KLS BOM for its information.

6 Considered the proposal regarding conduct of Hackathon on application of "Secured Digital Method of entry/exit to KLS GIT for special events at KLS GIT" submitted by HOD-CSE (Amount involved: ₹70,000/-)

Preamble: HOD-CSE submitted proposal regarding conduct of Hackathon on application of "Secured Digital Method of entry/exit to KLS GIT for special events at KLS GIT". It is stated that, department of CSE is planning to conduct a 24-hours Internal Hackathon for circuit branch students of KLS GIT.

The objective of the Hackathon is to "Design and Develop a Secure Entry/Exit Verification System to Prevent Unauthorized Access through Fake ID Cards and VIP Passes". Top 10 Teams will be selected from the Idea Submission round for the said Hackathon.

It is proposed to conduct 24-hours Hackathon for the selected teams in offline mode. The event is planned tentatively in the September last week. Comparison Between Existing System and Proposed New Technology Implementation are given below:

Previous System (RFID) Disadvantages	Proposed New Technology Implementation
1. Limited read range: RFID tags often required close proximity for scanning, causing bottlenecks at entry points. 2. Interference issues: Metal objects and other RF signals could interfere with RFID readings, leading to false negatives. 3. Cost: High-quality RFID tags and readers can be expensive, especially for large-scale events. 4. Security concerns: Some RFID tags can be cloned or hacked, potentially compromising event security. 5. Single-use nature: RFID tags were often disposable, creating waste and recurring costs.	To address these issues and improve the entry/re-entry/exit process, we propose implementing a QR code-based digital system. This solution offers several advantages: 1. Easy to use: Attendees can receive QR codes on their smartphones, eliminating the need for physical tags. 2. Improved security: Dynamic QR codes can be generated for each entry/re-entry, reducing the risk of unauthorized access. 3. Real-time data: A digital system can provide instant updates on attendance, allowing for better crowd management. 4. Cost-effective: No need for specialized hardware; standard smartphones can be used as scanners. 5. Contactless: Reduces physical contact, addressing health and safety concerns. 6. Integration capabilities: Can be easily integrated with event management software for comprehensive event control. 7. Flexibility: QR codes can be easily updated or revoked if needed. Implementation of this digital QR code system would significantly enhance the efficiency, security, and user experience of entry management for KLS GIT special events.

Discussion & Decision:

GC noted the details placed in the meeting.

GC accepts the proposal and sanctions ₹1,80,000/- towards replacement of existing PVC outlet pipes and other minor civil works for Chemistry Lab.

GC directed HOD-Chemistry to submit a report regarding practices followed for the disposal of chemicals in the Chemistry Lab.

Quotations be invited and placed before GC for finalization of agency.

Matter is referred to KLS BOM for its information.

8 Considered the proposal regarding procurement of Dead-End Filtration System for Nanofiltration Membrane submitted by HOD-Chemistry (Amount involved: ₹2,95,000/-)

Preamble: HOD-Chemistry Dept. submitted proposal regarding procurement of Dead-End Filtration System for nanofiltration Membrane. It is stated that, Chemistry Dept. would like to procure a Dead-End Filtration System, a crucial instrument for advancing our research in the field of membrane technology. This equipment is essential for conducting studies on the rejection of salts, heavy metals, divalent cations (such as calcium and magnesium), and the removal of dyes from various water sources.

Benefits of having the instrument:

- i. The instrument is useful for other department like ME, EC, EE, CV, AE etc. for research.
- ii. This instrument helps many final year students (B.E/B.Sc) to complete their projects.
- iii. Activities on membranes for Battery, Supercapacitor, Membrane Electrodes, Air filtration, Water filtration, ACs, Biological safety labs use membrane/clean room etc. can be demonstrated for Sixth semester open elective on Nanoscience and Nanotechnology.
- iv. The above activities can be conducted for Certification program on "Nanotechnology".
- v. Researchers in the field of membrane technology can potentially benefit from the equipment.
- vi. Articles can be published in journals with a Q1/Q2 ranking, which benefits the institute's NIRF rankings, NBA, and NAAC accreditations.
- vii. This also aids in the initiation of collaboration with institutions in the surrounding area.
- viii. Centre for Nanoscience and Nanotechnology has published good number of research papers involving students.

The total cost for the procurement of the Dead-End Filtration System is ₹2,95,000/- (inclusive of 18% GST).

Office Note: The budget details are as under:

1	Dept.:	Chemistry
2	Budget-Head:	Lab. Equipment
3	Amount Sanctioned:	₹3,50,000
4	Amount Utilized:	NIL
5	Amount Committed:	NIL
6	Budget-Balance:	₹3,50,000
7	Amount of said proposal:	₹ 2,95,000
8	Balance after the sanction of proposal	₹ 55,000

Discussion & Decision:

GC noted the details placed in the meeting.

GC accepts the proposal and sanctions ₹2,95,000/- towards procurement of Dead-End Filtration System for Nanofiltration Membrane.

Quotations be invited and placed before GC for finalization of agency.

Matter is referred to KLS BOM for its information.
