4 Discussed about applying for funding to Ministry of Electronics and ITY (MEITY) for establishment of Centre of Excellence in Artificial Intelligence and Cyber Defence submitted by Dean IRDC

Preamble: Dr. Swetha Gouder, Professor & Dean IRDC submitted proposal requesting permission to apply for funding to Ministry of Electronics and Information Technology (MEITY) for establishment of Centre of Excellence in Artificial Intelligence and Cyber Defence. It is stated in the proposal that, today, more and more corporations in all industries worldwide bank on methods of AI to significantly improve their products, processes and services. The use of these technologies such as machine learning and predictive analysis requires modern and efficient hardware and perfectly trained specialists with cyberwarfare. The advancement of AI is conical by a massive shortage of skilled personnel and the lack of key technologies in the form of a hands-on or practical approach in many firms and institutes. This is where institute nowadays play a vital role in facilitating and preparing equipped AI workforce for future.

With all the above features and regular academic laboratories of KLS GIT, we want to establish a Centre of Excellence in AI with a laboratory set up for hands on exposure. Objective of establishing CoE in AI with Cyber-defense system is to facilitate and leverage transformative technologies to foster innovation and adoption for social impact.

The heart of the AI COE is the NVIDIA AI Supercomputer. With a pre-built, scalable and proven reference architecture, NVIDIA DGX becomes the ideal platform for research & experimentation. DGXA100 GPU continue to advance AI supercomputing platform and enable researchers to tackle the world's most important scientific and big data challenges. NVIDIA DGX A100 is the universal system for all AI infrastructure, from analytics to training to inference. It sets a new bar for compute density, packing 5 petaFLOPS of AI performance into a 6U form factor, replacing legacy infrastructure silos with one platform for every AI workload.

To setup with above infrastructure, CoE in **AI and Cyber Defense** demands huge investment from the institute. From the industry experts and collaborated startups we got to know that the **Ministry of MEITY and Skill Development** funds such projects, if we apply with the proper justification for impact on society through sensitization and skill development in the region.

Hence, it is requested to permit us to apply for the MEITY and Skill Development for funding. It is proposed that Principal Investigator will be Dr Swetha Indudhar Goudar and Co-Principal investigator will be Dr Uttam Deshpande.
