Notably, more than 100 research papers have been published in reputed national and international journals with data generated using this spectrophotometer, reflecting its significant contribution to research output.

This instrument is no longer functioning and has reached the end of its operational life after several maintenance efforts. M/s. Agilent Technologies, the manufacturer, has informed us that they have discontinued the production of this model and are no longer providing service support for it

At present, six Ph.D. students are actively pursuing research, and their work has come to a complete standstill due to the unavailability of this essential analytical instrument. The UV-Visible Spectrophotometer is indispensable for qualitative and quantitative analysis in chemical research, and its absence severely hampers experimental progress and publications.

In view of the above, it is requested to consider the proposal and sanction ₹12,00,000/- towards purchase of UV-Visible Spectrophotometer.
